※ Frequently Asked Questions

1. How to do when Bluetooth connection is not on?
① Connection / reconnection fails or the connection / reconnection is very slow.
Ans: Because the Bluetooth wireless connection algorithm interference problem, the time may vary for each connection will be, if it's not as a long connection, you can try the following method after reconnection:
① 15 seconds after turning off Bluetooth, and then restart the Bluetooth;
② restart the phone;
③ Cancel the Bluetooth or cancellation account before linking.

2. When pairing can't search the band?

A: Because the bracelet Bluetooth radio is not phenomenon. Make sure that the bracelet is electric, and electric, and the watch is not already connected to the other phone. Then bracelet near the phone, if still valid, please turn off Bluetooth after a certain time interval and then connect.

3. Bluetooth connectivity has been open to 7 Off if there is data?

A: No long press data time, exercise and sleep time will be kept on hand ring number. When the phone and the Bluetooth connection is successful bracelet, handling data is automatically uploaded to the mobile terminal. But the bracelet can move about one week if data space is full, the system will automatically convert the oldest data. So pay attention to timely upload the data to the Terminal.
Note: If it is turned remote button, you must maintain the Bluetooth is connected.

4. why APP distance, color value and bracelet on inconsistency?

A: Because each person's body mechanism, the corresponding data is not consistent color value inconsistency, so the user should first set up your personal information to hand ring after synchronization, and then view for motion data.

5. why not charge the band?

① Make sure the best insertion direction is correct.
② When the band capacity is less than 3.6v, there will be a period of pre-charge battery time.
Note: General plug charge 3 to 5 minutes, can enter normal state charge.

6. charging the screen how to display?

① precharge: When Techmate battery is completely discharged, the charging, the best work is five minutes to respond.

② Charging: The battery icon on the screen has been moving constantly from one cell to the full grid.

③ Full charge: The battery icon has been in full-ohm.

7. has been wearing a bracelet, Bluetooth radiation will not cause harm to the human body?

A: Bluetooth bracelet radiation value Techmate much smaller than the American FCC standards, which can be negligible, long-term wear will not cause radiation damage to the human body. Instead, the wristband unique PPS "non-soluble infrared silicon chip" monitoring area wear can effectively reduce radiation damage, promote blood circulation.

8. if there are many times a day to sleep, Techmate will accurately record it?

A: Yes, but only recorded sleep data Techmate day 21:00 to 9:00 the next morning between.

9. abnormal vibration

A: This phenomenon may be due to open the "Mobile Anti-lost" cause like triggering. As the vibration.

Bluetooth connection signal will be affected by various factors, the Bluetooth signal is weak or when disconnected bracelet will vibrate. It is recommended that this function off when not needed. If prolonged abnormal vibration, consider the ring to be resolved through switch hands.

10. why band can not count step up?

A: When the hand entering sleep mode, pedometer function is invalid. Since entering sleep mode by APP operation, so sometimes because of no electricity and other factors hand opens the sleep mode but the user's knowledge. So when the hand can not count steps limited to start ring sleep sleep mode interface to see whether and if yes, the connection operation bracelet bracelet sleep function again so not of sleep mode, if yes, then return or contact the manufacturer.

8. Bands are waterproof?

A: hand ring used waterproof design, water-resistant to IP67, waterproof splash, usually in the face and work your hands when you can normally use, but is not recommended to wear while swimming.

※ Schematic of Charging Watchband

※ Product Specification

Bluetooth version: 4.0
Frequency range: 2.4 GHz
Charging time: 2 hours
Working hours: 5-10 days

※ System Requirements

mobile terminal platform requirements:

The phone supports Bluetooth 4.0 BLE,

reference model:

Samsung Note3, S4, Google Nexus4

iPhone4, iPhone5, iPhone5s

Support Android 4.3 and above,

Support IOS 6 and above.

The first phase of temporary support Android

phones and the iPhone

Support TSP and 1080P resolution US, phone

dynamic adaptive

Support English / Simplified Chinese

Support APP version detection and OTA upgrade
